

Lapro Surge®

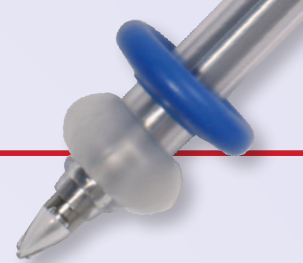

Balloon Trocars

For atraumatic and secure cannula fixation during laparoscopic surgery

Balloon Trocars

The latex-free balloon trocars from LaproSurge provide enhanced stability throughout laparoscopic procedures by additional fixation from above and below the abdominal wall, reducing unintentional cannula migration.

The atraumatic stabilisation helps to minimise fascial trauma while also maintaining pneumoperitoneum, even after incisions have been enlarged for specimen removal.

After trocar insertion, the balloon is inflated with air through the cannula's inflation port using the syringe supplied.

Once in position, the gel anchor or retention disk is adjusted to the required cannula depth to gently fix the cannula to the patient's abdomen.

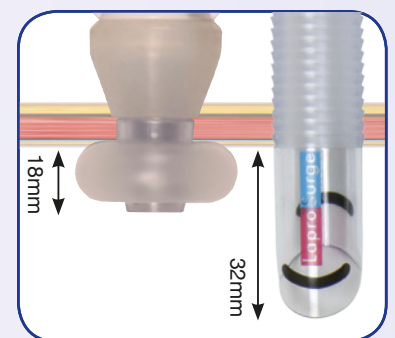

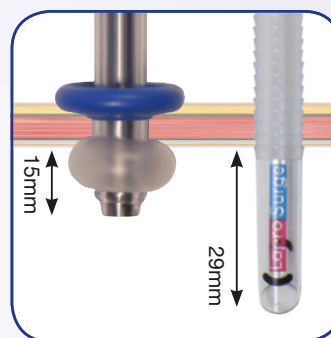

- 5mm, 10/11mm and 12mm balloon trocars supplied with a retention disk for stability
- 12mm balloon trocar also available with an adjustable gel anchor grip with suture tabs for additional fixation

Reduced Abdominal Intrusion

5mm and 10mm-12mm balloon trocars reduce abdominal intrusion by 48% and 44% respectively compared to standard threaded cannulas by fixing the cannula into position at the distal end.

The reduced intra-abdominal cannula depth increases working space and in turn enhances visibility.

Product	Ordering Code	Fixation	Length	Box Qty
5mm Balloon Cannula only	BC5SS-C	Retention disk	70mm	5 units
5mm Balloon Cannula and Optical Trocar	BC5SS-O	Retention disk	70mm	5 units
5mm Balloon Cannula only	BC5SL-C	Retention disk	100mm	5 units
5mm Balloon Cannula and Optical Trocar	BC5SL-O	Retention disk	100mm	5 units
5mm Balloon Cannula with Bladed Trocar	BC5SL	Retention disk	100mm	5 units
10/11mm Balloon Cannula only	BC10SLR-C Auto	Retention disk	100mm	5 units
10/11mm Balloon Cannula and Optical Trocar	BC10SLR-O Auto	Retention disk	100mm	5 units
10/11mm Balloon Cannula with Bladed Trocar	BC10SLR Auto	Retention disk	100mm	5 units
12mm Balloon Cannula only	BC12SL-C Auto	Gel cone	100mm	5 units
12mm Balloon Cannula and Blunt Trocar	BC12SHL Auto	Gel cone	100mm	5 units
12mm Balloon Cannula and Optical Trocar	BC12SL-O Auto	Gel cone	100mm	5 units
12mm Balloon Cannula only	BC12SLR-C Auto	Retention disk	100mm	5 units
12mm Balloon Cannula and Optical Trocar	BC12SLR-O Auto	Retention disk	100mm	5 units
